LAMBDABOARD[®]

VERTICAL CLADDING INTERNAL & EXTERNAL INSULATION

LAMBDABOARD[®] is the ideal choice for vertical cladding in all building categories especially in retrofits. It is manufactured in a continuous process with a closed cell PIR core bonded to 2 flexible substrates.

With the high compressive strength and excellent dimensional stability LAMBDABOARD[®] white mineral can be used in side cladding, composite walls and masonry wall with Ecolam foil or kraft facing insulation LAMBDABOARD[®] does not lose insulation properties during its lifespan.

VERTICAL CLADDING INTERNAL & EXTERNAL INSULATION

BENEFITS

LAMBDABOARD® can be used internally and externally as an insulation on a vertical application

Lightweight alternative to traditional masonry walling

Easy to configure for electrical equipment

LAMBDABOARD® is a low maintenance alternative

LAMBDABOARD® can be plastered and painted to achieve a smooth finish

INSTALLATION

LAMBDABOARD® can be fixed directly on to the inside of girts using H or T-Sections. Or can be fixed in conjunction with the cladding through LAMBDABOARD® using approved fasteners.

SPECIFICATION FOR BOQ

LAMBDABOARD® is a laminated polyisocyanurate core board with a minimum core density of 34kg/m³, a minimum thickness of ____ mm; faced with ____ and laminated on both sides. Suppliers fixing details supplied in widths of 1220 mm with a ____ (Km²/W) R-Value. Finish shall be white mineral and mineral natural laminated on each side. LAMBDABOARD® to be installed using H or T-Sections fixed on to inside or outside of cladding girts in accordance with manufacturers specification.

▶ APPLICATION: BESPOKE COMPOSITE INTERNAL CLADDING

LAMBDABOARD® laminated polyisocyanurate core board with a minimum core density of 34kg/m³, minimum thickness of 30 mm; in widths of 1 220 mm with a 1,25 (Km²/W) R-Value. Finish shall be white mineral and mineral natural laminated on each side, with a 9 mm plasterboard laminated on one side using Rigibond 5 adhesive. LAMBDABOARD® must be installed using nylon anchors (approximately 4 per m²) counter sunk into the board with a fibre tape used on the joints and on the fixings. Skimming of the board can be done as per manufacturers specifications.
